University Hospitals

The University
Hospital

The University
Children's Hospital

The University
Dental Clinic

The Orthopedic-Rehabilitation
University Hospital

Medical Campus

Innovative Medical Education Center - didactic base for students in medicine, dentistry, nursing and midwifery

Faculty of Pharmacy

Dormitories with a sport complex

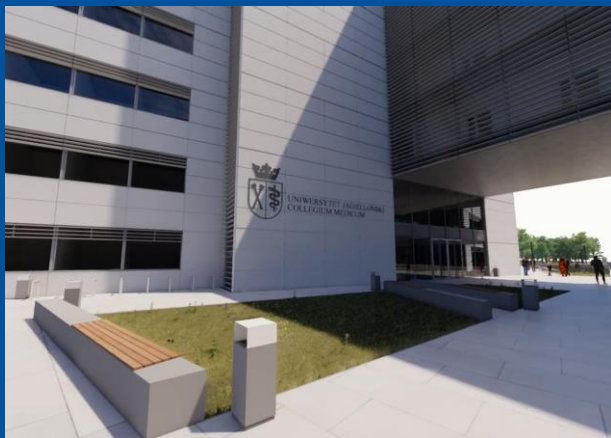

The University Children's Hospital – the largest pediatric hospital in the region

University Hospital – the most modern hospital in Poland, a leading medical facility that combines experience and tradition with the latest trends in medicine

Investment Project - teaching and research center

Building laboratories, research modules, classrooms, and an animal facility is all part of the next development stage of the Medical Campus of the Jagiellonian University Medical College, which is the creation of a modern teaching and research center. Such facilities will allow for a comprehensive employment of the scientific potential of the three faculties of the Jagiellonian University. Medical research in various areas from basic research, through optimization of treatment, to solving problems in the field of public health will be carried out here.
